

# Salary Survey

College Placement Council, Inc. • 62 Highland Avenue • Bethlehem, PA 18017

The preliminary *Salary Survey* report for the 1988-89 academic year contains few surprises. Most notable is the reflection of the still developing crunch in supply/demand for chemical engineers. For the first time, the dollar value of offers to Chem. E.'s tops that of petroleum engineers, who have traditionally led the field. CPC's Field Services coordinators report that the demand for the limited supply of chemical engineers shows no sign of slackening.

The January report is compiled from those offers received by CPC from the reporting network of 418 participating college career planning and placement offices. Since the survey has been greatly expanded this year, and a new reporting system installed, many of the data sources have not yet contributed salary figures.

As a consequence, many of the disciplines have not as yet accumulated a statistically significant data base. However, the early indicators show modest increases in salary offers since the September 1988 report in the more heavily recruited disciplines of accounting, mechanical and chemical engineering, engineering technology, and allied health.

Looking at the groups of related disciplines, business and engineering graduates are receiving

modestly higher offers compared with September 1988, while offers in the humanities and social sciences, communications, and sciences are somewhat lower than in the 1987-88 year-end report.

Several new groups of disciplines make their first appearance with this report: education, agriculture and natural resources, computer sciences, and health sciences. Salary offers to these disciplines were formerly included in other curricula or were not reported.

Also new to the report this year is a table of job functions by bachelor's-degree curricula. It provides a breakdown of average starting salary offers to graduates by discipline and functional area. The table appears on pages 18 - 33.

The CPC *Salary Survey* January report covers the period from September 1, 1988, to January 9, 1989. The data include offers extended to students graduating between September 1, 1988, and August 31, 1989. Additional copies of this report are available to CPC members and *Salary Survey* subscribers for \$2 each.

## SCOPE AND NATURE OF THE SURVEY

The scope, nature, and coverage of the CPC *Salary Survey* are particularly important to the interpretation and proper use of the statistics.

The study surveys a fairly consistent population which includes 418 career planning placement offices of colleges and universities across the United States. Offers are reported from employing organizations in business, industry, government, and non profit and educational organizations. The offers are base starting salary offers and do not include fringe benefits or overtime. The data cover a broad range of functional positions. Confidentiality is maintained for the individual, the college, and the employer.

The *Survey* reports offers, not acceptances, with no limit on the number of offers per student. Therefore, offers in the study cannot be equated with actual hires, and when the economic climate changes substantially, the ratio of hires usually changes also, making comparison with other years no longer valid. In those categories where offers are relatively few, the data should only be regarded as an indication.

The *Survey* is available only to members of the College Placement Council and *Salary Survey* subscribers and is intended for the professional use of its constituents. Reports are issued in January, March, July, and September.

# Salary Survey

College Placement Council, Inc. • 62 Highland Avenue • Bethlehem, PA 18017

Since the January *Salary Survey* appeared, there have been questions raised about the shift to reporting annualized figures rather than monthly figures as has been our past practice. The change was made in response to feedback received from two CPC task groups, a survey conducted in 1987, and reports from CPC's field services people.

CPC is capable of reporting the salary offers in either format. The data are in the computer and may be accessed either way. To get a reading on the current preference of CPC members and subscribers, we have included a ballot with this report. Please take a moment to mark your preference and return the card to CPC. We will report the results and adjust the *Salary Survey* accordingly.

Longtime users of *Salary Survey* also will note that the early offers reported in January normally reflect decreases compared with the previous year-end salary figures. In addition, many of the categories do not have a sufficient number of offers reported to CPC to provide a statistically sound base. The figures are accurate, but there are not enough of them. Users of the *Survey* are cautioned to use it with care and judgment.

As the recruiting season progresses, reporting of job offers also increases, and, consequently, the March *Salary Survey* provides more significant numbers for comparisons with the 1988 year-end figures. The number of categories with statistically sound bases also increases.

In the March report, the trend continues for chemical engineers as they maintain the top dollar position among engineering graduates with an average offer of \$32,812, 5.9 percent above last year. Petroleum engineers run a close second with an average dollar offer of \$32,202. After an initial decrease shown in the January report, this is now up slightly from September 1988. Both aerospace and mechanical engineers also posted gains, with average dollar increases of 3.6 percent and 3.2 percent, respectively.

Average salary offers to business disciplines also were favorable. Management information systems graduates received the best news of these disciplines with 9 percent higher salary offers, for an average of \$27,090. Accounting graduates experienced 5.3 percent higher salary offers with an average of \$25,261. Offers to business administration graduates rose 4.3 percent to \$22,371, while human resources graduates received an average dollar offer of \$21,716, a 6.9 percent increase since last year. However, hotel and restaurant management graduates saw a slight downturn in their average dollar offer (1.8 percent lower) to \$19,767.

In the health fields, allied health graduates experienced 6.3 percent higher salaries with an average dollar offer of \$23,950. On the down side, nursing graduates received 2.5 percent lower salaries with an average dollar offer of \$23,062.

It is too early in the recruiting season to make any judgments on the outlook for this year's M.B.A. graduates. Although average dollar offers are currently running lower than last September's for M.B.A. candidates with nontechnical undergraduate degrees, traditionally most M.B.A. recruiting is in the spring which usually results in a higher average dollar offer by year-end. However, for M.B.A. candidates with technical undergraduate degrees, only those with no experience saw a lower average dollar offer. Those with experience already gained at least 9.5 percent higher offers since last year.

The CPC *Salary Survey* March report covers the period from September 1, 1988, to March 6, 1989. The data include offers extended to students graduating between September 1, 1988, and August 31, 1989. Additional copies of this report are available to CPC members and *Salary Survey* subscribers for \$2 each.

Statistical Services Specialist

## SCOPE AND NATURE OF THE SURVEY

The scope, nature, and coverage of the CPC *Salary Survey* are particularly important to the interpretation and proper use of the statistics.

The study surveys a fairly consistent population which includes 418 career planning and placement offices of colleges and universities across the United States. Offers are reported from employing organizations in business, industry, government, and non profit and educational organizations. The offers are base starting salary offers and do not include fringe benefits or overtime. The data cover a broad range of functional positions. Confidentiality is maintained for the individual, the college, and the employer.

The *Survey* reports offers, not acceptances, with no limit on the number of offers per student. Therefore, offers in the study cannot be equated with actual hires, and when the economic climate changes substantially, the ratio of hires usually changes also, making comparison with other years no longer valid. In those categories where offers are relatively few, the data should only be regarded as an indication.

The *Survey* is available only to members of the College Placement Council and *Salary Survey* subscribers and is intended for the professional use of its constituents. Reports are issued in January, March, July, and September.

A study of 1988-1989 beginning offers

# \$alary \$urvey

July 1989

College Placement Council, Inc. • 62 Highland Avenue • Bethlehem, PA 18017

**SPECIAL BULLETIN:** A ballot was included with the March 1989 *Salary Survey* report so that users could indicate their preference for either monthly or annual salary figures. More than 800 users responded and 75 percent of them said they preferred annual salaries, the current format of the *Salary Survey*. Thus, CPC will continue to report annual salary figures. However, we are investigating the possibility of reporting both annual and monthly figures.

Recruiting on college campuses has reportedly gained considerable momentum since last year. The July 1989 *Salary Survey* report supports this, showing substantial increases in average starting salary offers for most disciplines.

Starting salary offers to chemical engineers continue to climb. The average offer to these graduates is now \$32,949, 6.3 percent higher than last year. However, since the March 1989 report, petroleum engineering surpassed chemical engineering to regain the top-dollar position. The average dollar offer to petroleum engineers rose 3 percent since last year to an all-time high of \$32,987.

Men received 80 percent of the offers reported in the engineering disciplines. However, women graduates in petroleum engineering were offered the highest overall average engineering salary of \$33,728.

Bachelor's-degree candidates in the business disciplines are also benefiting from this year's strong corporate recruiting. The average starting salary offer to accounting graduates increased 5.4 percent to \$25,290. Business administration graduates experienced a 3.8 percent increase to an average of \$22,274.

Graduates in human resources posted the biggest gain—a 13.4 percent jump to an average of \$23,035. Management information systems graduates received an average dollar

offer of \$26,861, an increase of 8 percent since last year. Hotel and restaurant management graduates registered a slight decrease of 1.3 percent to an average of \$19,859.

Offers to men and women in the business disciplines were closely split, with 53 percent of the offers going to men and 47 percent to women.

The expanded *Salary Survey* now reflects the demand for graduates in the allied health fields. Starting salary offers to these graduates rose 8.7 percent since last year to an average dollar figure of \$24,496. Nursing graduates also gained. The increased demand for nurses pushed their average offer 4.8 percent higher to \$24,789.

At the master's-degree level, graduates also fared well. Slight increases were garnered by M.B.A. candidates with both nontechnical and technical undergraduate degrees and no work experience. Those with experience received at least 3.3 percent higher salary offers. The greatest increase—8.9 percent—went to M.B.A. candidates with technical undergraduate degrees and two to four years of work experience. Their average dollar offer was \$47,967.

The CPC *Salary Survey* July 1989 report covers the period from September 1, 1988, to June 5, 1989. The data include offers extended to students graduating between September 1, 1988, and August 31, 1989. There are 418 career planning and placement offices at colleges and universities across the United States participating in the *Salary Survey*. The report is available to CPC members and *Salary Survey* subscribers. Additional copies of the July report are available to members and subscribers for \$3 each.

## SCOPE AND NATURE OF THE SURVEY

The scope, nature, and coverage of the CPC *Salary Survey* are particularly important to the interpretation and proper use of the statistics.

The study surveys a fairly consistent population which includes 418 career planning and placement offices of colleges and universities across the United States. Offers are reported from employing organizations in business, industry, government, and non profit and educational organizations. The offers are base starting salary offers and do not include fringe benefits or overtime. The data cover a broad range of functional positions. Confidentiality is maintained for the individual, the college, and the employer.

The *Survey* reports offers, not acceptances, with no limit on the number of offers per student. Therefore, offers in the study cannot be equated with actual hires, and when the economic climate changes substantially, the ratio of hires usually changes also, making comparison with other years no longer valid. In those categories where offers are relatively few, the data should only be regarded as an indication.

The *Survey* is available only to members of the College Placement Council and *Salary Survey* subscribers and is intended for the professional use of its constituents. Reports are issued in January, March, July, and September.

A study of 1988-1989 beginning offers

# Salary Survey

September 1989

College Placement Council, Inc. • 62 Highland Avenue • Bethlehem, PA 18017

The race to attract this year's college graduates continued its vigorous pace right up until the end of the recruiting season. The results are reflected in the September 1989 *Salary Survey*.

Chemical engineers are the leaders among the 1988-89 engineering graduates, garnering top dollar offers. They finished the year over petroleum engineers, who previously received the highest average salary. Starting pay for chemical engineers averaged \$32,949, a 6.3 percent increase over last year. Petroleum engineers followed with \$32,789, a 2.4 percent gain.

Graduates in other engineering disciplines also fared well. Mechanical engineers received a 3.8 percent higher dollar average, drawing \$30,490, while civil engineers' salary offers rose 5.7 percent to \$27,046. Female petroleum engineers were extended the highest average salary offer of all the engineering disciplines—\$33,053.

Salary offers to business graduates climbed considerably since last year with the biggest hike—12.4 percent—going to human resources graduates. Their average salary offer was \$22,842. Accounting majors ended the season with an average salary offer of \$25,223, an increase of 5.1 percent over last year. Dollar amounts to business administration candidates rose 4.6 percent to \$22,450, while management information systems graduates encountered a 7.7 percent jump to an average of \$26,772. However, 1988-89 starting salary offers to hotel and restaurant management graduates are below last year's, falling 2.3 percent to \$19,657.

Health-care candidates benefited tremendously from the increased demand for professionals in this field. Allied health graduates registered an 8.3 percent gain over last year, averaging \$24,416. The need for nurses pushed their average starting salaries up 5.3 percent to \$24,915.

Employment offers to nontechnical and technical bachelor's-degree holders were closely split with 49 percent going to nontechnical candidates and 51 percent to technical graduates. The highest average starting salary offer to nontechnical candidates—\$28,711—was made by investment banking employers. The petroleum and allied products industry provided the greatest dollar amounts—\$32,400—to technical graduates.

This year brought good news to graduates at the master's-degree level, as well. M.B.A. majors with non-technical undergraduate degrees and no work experience garnered a slight boost in the average dollar amount to \$33,873. However, their technical counterparts with no work experience received a 3.3 percent lower salary than last September, averaging \$37,102. M.B.A.s with technical undergraduate degrees and more than four years work experience posted the greatest increase—8.4 percent to an average of \$49,296.

The CPC *Salary Survey* September 1989 report covers the recruiting period from September 1, 1988, to August 9, 1989. The data include offers extended to students graduating between September 1, 1988, and August 31, 1989. There are 418 career planning and placement offices at colleges and universities across the United States participating in the *Salary Survey*. The report is available to CPC members and *Salary Survey* subscribers. Additional copies of the September report are available to members and subscribers for \$3 each.

## SCOPE AND NATURE OF THE SURVEY

The scope, nature, and coverage of the CPC *Salary Survey* are particularly important to the interpretation and proper use of the statistics.

The study surveys a fairly consistent population which includes 418 career planning and placement offices of colleges and universities across the United States. Offers are reported from employing organizations in business, industry, government, and non profit and educational organizations. The offers are base starting salary offers and do not include fringe benefits or overtime. The data cover a broad range of functional positions. Confidentiality is maintained for the individual, the college, and the employer.

The *Survey* reports offers, not acceptances, with no limit on the number of offers per student. Therefore, offers in the study cannot be equated with actual hires, and when the economic climate changes substantially, the ratio of hires usually changes also, making comparison with other years no longer valid. In those categories where offers are relatively few, the data should only be regarded as an indication.

The *Survey* is available only to members of the College Placement Council and *Salary Survey* subscribers and is intended for the professional use of its constituents. Reports are issued in January, March, July, and September.
